EXCLUSIVE **Introducing CXT3GR: The HSPA Cellular Router**

This device allows sharing your HSPA internet connection (cellular) to your family, your colleague or simply your friends. It can be fixed at home or mobile while driving..

Simply use a SIM card from your cell phone provider, insert it into the CXT3GR router, and that's it. You share the internet of your SIM card to your(s) computer(s): wired and wireless.

No need to buy costly cards and neither long contracts

Our CXT3GR router works with all HSPA provider: you have the liberty to use your preferred cellular provider, either here in Canada or while moving around the planet. By using a local provider from where you are, you stay away from expensive roaming fees. By buying a SIM card, you don't buy expensive equipments and you're free from long contract. Perfect for short period of time usage: for a week on travel, for a month on contract, for a camping season, etc.

The CXT3GR router offers advanced features as: configurable firewall, URL blocking , MAC address filtering, Dynamic DNS, WEP/WPA/WPA2 encryptions, NAT and DHCP server, VPN support, DMZ function, etc.

Perfect for:

- ✓ High-speed in new suburbs and out of country
- ✓ Emergency services
- ✓ Expositions (connect your POS terminal)
- ✓ Truckers and charter bus
- ✓ Campers and motor homes
- ✓ Backup link during outages

A week cellular signal? No problem!

Our company, Cell Extreme inc, have since many years all what it takes to increase the signal and cell phone coverage for this product and also at your location. Connect an external antenna to it in order to increase signal and the connection speed.

(Testé dernièrement même à Puerto Vallarta)
